Dear Dr Dawson. Dr Hagen is Prof. of Entomology here and is a specialist in Neuroptera — but I judge by his comments rather too much of a specialist. I saw he had "put his foot in it" with that fern leaf and so remarked to a friend, and you confirm my surmises. I cannot now at all remember what specimen it was I took to Europe & showed being but probably we could tell together between us by examining the specimens together. I could throw out some of you others. But all the specimens are not now here, some being at St. Johns I send with this a package to your son of plates of Columbia foss. ins. (samples only) addressed to him at Montreal J. H. S.
