1881

My dear Sir; I shall be pleased to
get samples from the top, middle and bottom
of the seam to send to Prof. Williamson.
I will also endeavor to get specimens of other
seams to enclose, and then advise you what
I have got. You know I suppose that the
main seam is no longer worked, the pit still being
closed and in consequence of the explosion of last
November. The other mines are now working
the crops of the Deep, Third and Mr. Grey's seams.

Yours very truly,
A. S. Poole
