

Ithaca, N.Y.

June 22/87

My dear Dr Dawson

I have just received and opened the box of fossil plants.

I have before expressed my deep appreciation of your kindness.

I have learned much and with increased knowledge, a deep interest has been kindled in the problems connected with the Devonian Flora. But I wish especially to thank you for identifying the material for me.

You have returned some of the specimens I intended you to keep if you desired them. But I hope to be able to get some more specimens to send with them during the summer.

Sincerely yours
Henry S. Williams
