

Address ~~of~~
up to 2nd Sep. Gaspé Basin.
D. Allouise
N.B. 21st Aug. 1881.

Dear Sir,

I succeeded in
obtaining a small
collection of plants
from the Beds in
Scammanac Bay.

Though I searched
in several places I
failed to discover
the most productive
plant bed, or beds,
though my man
found specimens in

one or two places high up
on the cliffs of the sand-
stone with fragments
of plants. I have
packed the specimens,
putting a label with
each one, & addressed
them to you, to McGill
College.

With kind regards

Believe me

Yours very truly

A. H. Foord.

Dr. L. W. Dawson, C. M. S., F. R. S.,

P.S. You will find two
specimens of *Pterichthys*
in the box containing the
Plants, which I thought
might be acceptable
for the McGill Museum.

A.W.F.
