

Penn. Geol. Surv. August 23, 1881-

Dr. J. W. Dawson, Esq.,

Dear Sir: Your paper on "New  
Erian Plants" was received a few days since.  
Please accept my hearty thanks for the same  
and also for the ~~honor~~<sup>credit</sup> of the discovery  
of something new not forgetting the honor conferred  
by naming the Equitites after me -  
As soon as the weather moderates Prof.  
Henry S. Williams (Prof. of Paleontology at Cornell University) and  
myself have engaged to spend quite a season  
exploring the Chert of the town of St. Albans, Vt. and  
I shall forward anything interesting to you -  
Very respectfully yours

Derwin H. Wright

P.S. Can I address the "London Geological  
Society" for two or three copies of the  
above-named paper? D. H. W.
