Dr. J. W. Dawson, F.R.S.,  
Pres. McGill College,  
Montreal,  
Canada.

Berlin Jan. 23. 9/10/81-

Dear Doctor: Your kind favor offering to send me some copies of the paper is recd. Very many thanks - if that is sufficient -

I have recently found "Spirophyton" ? in the Portage which I shall send you as soon as I get some material which I expect to secure shortly - Prof. Clark has been visiting me and says there is no doubt the Portage specimen is new - I have very fortunate of late in finding new fish remains in the Tully.

Very respectfully yours

Berlin D. Wright.
