

Perth 31st Oct. 1881

Respected Sir

I have been busy all this week
quarring at Gleno for the tracks.

We finished last night. To day
I have been reducing the sps as
far as I could with safety to the
sps. We will pack and ship to
morrow. The result may be
stated as follows. No 1 sp. in several
pieces is of the Perth kind & 11 feet
long not very good No 2, 7 x 5 feet
with a continuous piece 2 1/2 feet
which joins on to a corner this
is altogether in my opinion the
finest sp. I have seen both kinds
on it.

Oct 21st Oct 1881

Dear Mother

I have been doing all the work
quitting at 11 for the time being.
The furniture that night I thought
I have been thinking that you are
for an I would not apply to the
of the well made and for the
I know, the result may be
I am careful but of in some
pieces of the table kind of
I don't know how the 2nd of
with a certain piece of
which gives me to a corner the
in a table in my opinion the
piece of I have seen both kinds
with

No 3 pretty good 4 feet long
all these are from the upper side
or east - No 4 Consists of
what could be got from the bed
on which the original track
was made they are very much
broken up but in places 10 to
14 square feet may be understood
ly put together - I will be in
Montreal Monday night - The
whole will be forwarded in one
large barrel or boxes

yours with the highest
Respect

James Richardson
