

GEOLOGICAL & NATURAL HISTORY SURVEY.

Alfred R. C. Selwyn B.L.D., F.R.S., Director.

MUSEUM & OFFICE, SUSSEX ST. OTTAWA.

Oct. 22nd, 1881.

Dear Sir,

As I wrote to Mr. Frank Hicks a few days ago, I shall not be able to send down the paper on the Campbellton fossils in time for this month's meeting of the M. H. S., owing to a pressure of other work.

I shall hope, however, to have it ready very soon now, in good time for the November meeting, but without some explanations & illustrations the paper as prepared for the "Naturalist" would scarcely be popular enough for reading. Since you were at Campbellton Mr. Ford has made a second collection there. We could spare you tolerably good specimens of Cheirdapis from Scaumenac Bay, if you would like to get them.

Faithfully yours,

J. F. Whiteaves.
