11 Queen Victoria Street London 5 Jan, 1882. Thanks for
letter & greeting. To the latter I reply by reciprocity fully &
extensively to the former I will reply after communication with the
authorities. I see the first May contains a note by Barnardus denying the
vegetable nature of any part of the specimen. I will try to see
him & frame a note which Dr. M. can visit in the Science House
& ascertain what can be done as to the correction in further issues. The
world is daily ~~beco~~ becoming one in its facilities for inter-
communication & I am glad to reap the benefit

Yours faithfully
J.M.P.
