

Cornell University
Ithaca, N.Y. 10 June 82

Dr. Dawson,

Dear Sir,

Your cordial letter
in regard to the circular letter proposing
the formation of a Geological Society
is at hand.

I regret you were unable to give
any encouragement as to the cooperation
of the many able men in Canada with
us.

In case of the success of our project,
I trust some method may be devised
for the intercourse, and in some
measure, ^{the} cooperation of the workers
in these two countries - separated only by
political boundaries.

If you have a prospectus of the organization
of your new Society printed - may I beg
you to permit me to examine a copy -

With sincere regards

Henry S. Williams
