June 19th 82

My dear Sir

I hope to send on
Tuesday, the Guanche
skull & beads, & hair.

For your examination
& use. Should I
be able to be present
at the meeting of
the American Association
in August, I can
see you as to the
ultimate disposition
of these
relics of the Guanches.

I have today noticed
a point of identity
between the  & the
people of Morocco -
I noticed that the
pottery of Senaryffe
was always pierced
with small holes, so
that it could be hung
up. I have bought here
some Moorish pottery
& find strings
attached to each by
means of small holes
so that the dishes
could be hung up.

I have since writing
you seen Donnelly's
Atlantis, & find that
he has in a vague way
connected the name
Atlas with the Mexican
Azt. I took home last
year a paper in which
I printed out this, &
showed the connection
of Atlas myths with
those of Mexico, but as
I am preparing a book
I thought it best to
defer publication.

Hoping the box
will reach you safely

I am, my dear Sir,
Yours truly

(over) R. H. Burton

I have just heard
that you have
launched the Royal
Society of Canada with
50 members. I had
hoped Canada had
so many notable
men in science &
literature.

I am told Dr. H. J. Morgan
is not in the number.
I think this is a pity.
He has in his own line
of ~~the~~ bibliography
done good service
to the literature of
Canada —————
