

CITADEL, QUEBEC.

6th July 1882

Dear Principal Dawson.

His 4c^{ts} and party left here

yesterday morning for the Cascapecieu

so I have forwarded your letter and

the memorial for his consideration. We

shall fail to catch the next mail

to Engfernd. but it will be forwarded

by the one on Saturday week.

I shall hope to obtain Dr. Chauncey's
signature this morning.

I have sent the circular alluding
to the meeting of the American Society

to Mr. G. and he will no doubt

send you a definite reply.

We are having most disagreeable
weather - Probably the presence of all
that ice on the Eastern Coast during
the spring - The agricultural
prospects are rather dismal in
Gaspe and New Brunswick, unless

De Wub
July 188

they have some summer weather

shabby.

Always truly yours.

De Winton
