

American Association for Adv. of Science
Committee on Print. & Pub.

Montreal 28th July 1884.

Dear Sir

I am requested to inform you that the "copy" for the General Programme has been received from Sec. Putnam, and placed in the printer's hands. — I notice that blanks have been left in several places, where information is to be inserted from the Local Committees; and in one case blank space is left for "Notes" to come from you. Will you kindly supply these at your earliest convenience? Mr. Putnam says he will have "titles" to add up to the last moment of printing. The copy now in hand will be immediately set up, and on the proofs, may be added ^{your} ~~the~~ notes, as well as such information as the local Committees may supply. — The pages can then be made up and electrotyped.

and the remaining titles
referred to by Mr Putnam
can be added. Mr Putnam says
he will be in Montreal on the 18th
or 19th but he requests us to send
him first proofs prior to his
leaving Cambridge, which we
will do.

Yours very truly

S. E. Dawson
Chairman Print. Com.
