Springfield, Sept-29th 1889

Prof Dawson
Dear Sir

The specimens of *Eozoon* came safely to hand some days ago, but I have been away in the field nearly every day since their arrival. I have just packed a cigar box containing twenty species of our Coal Measure fossils including a specimen of *Acanthotelson Stimpsoni* the only species of Crustacea from the Mazon creek of which I have any duplicate. I have also added a good specimen of *Seaia tricarinata*, which is also quite rare. I trust the package which I shall forward to day by Express will arrive safely and prove a satisfactory return for the specimens of *Eozoon* I remain

Sincerely Yours

A. H. Worthen

Prof. Johnston

The specimens of Logan's canis capitatus that I had some days ago but I have been unable to find nearly every day since their arrival. I have just packed a cigar box containing a quantity of specimens of our Canis marionensis including a specimen of Canis marionensis the only species of Canis from the Logan canis capitatus group that I have seen. It is a good specimen of Canis marionensis which is also quite rare. About the Logan canis capitatus group I shall forward to you by express with care and safety and have a satisfactory return for the specimens of Logan canis capitatus group.

Prof. Johnston
