

Pittston Pa. November 2nd 1882

Prof- J. W. Dawson

Montreal

D. Sir.

Will you kindly send to Prof- Lesqueray at Columbus O. the Specimens of *Frocophyllum lineare* remaining in your hands as he had not completed the study of them when sent to you. Having completed the Vol. of *Cretaceous & Tertiary plants*, ^{on which he was then engaged} and returned to the *Carboniferous*, he now requests to see them again. If it can be made mutually advantageous at some convenient time I will be glad to make exchanges with you in both *Vegetable* and *Animal fossils*. Of the latter I have some very rare and good things but not the large number that I have of plants.

Very Truly Yours

R. D. Sacad
