

HERBARIUM OF HARVARD UNIVERSITY,

BOTANIC GARDEN, CAMBRIDGE, MASS.

Nov. 27th 1882

My dear Sir,

Considerable attention has been given to the question of the origin of *Helianthus tuberosus*, L., and it appears to be settled that it is not only a native of this country, but that it is the same as the *H. doronicoides* of our northwestern States — at least in part. Your correspondents may be referred to —

J. Hammond Turnbull & Sara Gray,
in Amer. Journ. Sci. 1877, pag. 347.

DeCaisne, in Flore des Serres,
vol. 23 (1864), p. 112.

and A. DeCandolle, L'Origine

Des Plantas Cultivadas, p. 34.

The latter work is but just
issued.

Yours very truly

~~Wm. Dawson~~
