GÖTTINGEN.

Göttingen, d. 15 ten März 1883

My dear Sir!

I thank you very much for your
kindness. The copies of your papers you
obligingly sent me, are very valuable
to me. I have sent you copies of those
of my papers, of which I still have
papers left, and I shall send you
in a few weeks, I hope, a paper on
5 new species of *Placoderms* from
our Upper-Devonian, the plates are
already made.

I am very much obliged to you also
for your kind acceptance of my offer
of exchange. I shall be very glad to

get your plants and any thing of Cana-
dian Crinoids and Trilobites, you can
spare. Please, let me know, which fossils
you would like most. I have plenty
of duplicates, especially from the North
of Germany; Devonian, Permian, Permian,
Trias, Jurassic (bes from the Cretaceous)
and Tertiary. Of course you want well
named and well preserved specimens,
and that is what I shall consider in
selecting them.

As to the mode of conveyance of
the parcels, I have no agent in England,
but I have inquired at Mrs Brauch and
Pothernstem, Continental Agents for goods.

and they write me, that their correspondents
at Montreal are Mrs. Cox and Green, who
may be asked to forward any parcel or
box for me to Mrs. Brash and Petherstein.

Believe me, dear Sir

Truly yours
Prof. Dr. H. von Haeren
Director of the R. Geol. Museum
