

Derby House Leeds
Oct^r 14th 1883

Dear Dr Dawson.

It was a great treat to
me to meet you as you may
imagine. I live very isolated
at this end of the town and most
of my friends I know by correspondence.
I wish I could have had a longer
talk or rather a longer "listen"
to hear you describe what you
know so well at first hand
in Canada and which I am

is very ignorant about.

I am sending you a few specimens
of my rubbish, just a few out
of 75 or 80. Would you let me
have as a souvenir a copy of
your photograph and one of Mrs
Dawson and if it be possible
for you before your return to
America to come & see us even
for a single night or a meal
it will be a great treat to us.
and when you get back, if you
have any scraps of your own
which you can spare do let me
have them. None will value them
more & perhaps use them better

Is there a map published showing
the distribution of the surface
beds in Canada. the loess, leda
clays etc etc. I hope you will
have a very pleasant visit to
the south. Give my best regards
to Dr & Mrs Williamson who were
very good to give me an opportunity
of seeing you. Remember me
very kindly to your wife &
daughter &

Believe me

Yours very truly

Henry H. Howarth
