Wolfville, N. S., *Nov. 5* 1883.

To J. W. Dawson  
My Dear Sir:

I beg to call your attention to the "Acadian Science Club" - an institution by whose humble means we hope to awaken a more general popular interest in the study of Nature. We are especially endeavoring to work upon & through the public school teacher, hoping that thus a wide spread influence may be exerted.

The work is necessarily a slow one for there is a great deal of apathy & indifference to be overcome & also some popular prejudice.

We are always thankful

*Pineo*

*Wm*

Wolfville, N. S., ..... 1883.

In help & encouragement I should be glad if you could approve your undertaking & allow us to publish your communication. Such would carry a great deal of influence. Should be glad of help in any way that you may think proper.

I send marked copy of Scientist.

I am

Respectfully yours  
A. J. Pineo

'Acadian Scientist'  
forwarded herewith.
