Andover, Mass. Nov. 28, 83.

To Principal J. N. Dawson,  
Dear Sir

I have been much interested  
in your exposition of the  
relation of Science to Religion,  
and I venture to send an  
article which may be of interest  
to you in Science for Nov. 9.  
under "Notes and News" Prof.  
Royce of Harvard notices the  
article from the standpoint  
of a disbeliever in the inductive  
theory of design.

W. P. P. says in terms with  
reference to the article. "Your  
line of exposition is clear and  
forcible." Prof. G. F. Wright

writer, "I think you have done  
good service to the cause  
of truth". Prof. Joseph Le Conte  
writes, "I can subscribe heartily to  
every thought in it."

I should be very glad  
to receive any criticism or  
suggestion from you. An article  
of mine on "Clarification  
of the Sciences" is to appear in  
Jan. Mind, possibly later, which  
may also be of interest.

Very Respectfully Yours,  
H. M. Stanley.
