

MIDDLEBURY COLLEGE,

MIDDLEBURY, VT.

Feb. 20, 1885.

Sir J. W. Dawson.

Dear Sir:-

Probably my expectation of finding something new in the form I sent you a few days ago may have made me hasty in my conclusions.

You will receive by post a hastily prepared microscopic slide which will give better than any drawing the markings which I regard as peculiar to the *S. amphthaloides*. The portions of the slide farthest from the center under an enlargement of 100 or 200 diameters but show the structure.

Yours very truly

Henry W. Hensley
