

GEOLOGICAL & NATURAL HISTORY SURVEY.

Alfred R. C. Selwyn B.L.S., F.R.S., Director.

MUSEUM & OFFICE, SUSSEX ST. OTTAWA.

My dear Sir William

March 7th 1885.

I take the liberty of enquir-
ing whether you would care for
an additional lot of Utica, Trenton &
Black River formation fossils. I have
a lot of duplicates still on hand and
if they are acceptable to the author-
ities of the Redpath Museum I shall
be happy to have them sent on.

of me
I have not felt very well & have had
to rest some, although have been
as busy as I could at palaeontology.
Hope to put through that appendix
to Thesis as soon as possible, the
sooner the better. The Field Naturalists
Club has just got a paper of mine
on additional notes on Geol. & Palaeont.
- copy of

Ottawa & vicinity. We have found the Hudson River formation here recently characterized, as about Rougemont & other typical H.R. localities, by Ambonychia radiata, Hall,

Modiolopsis several species, Myzozonia Heardi, Billings or Orthis erratica Billings Hall (Synonymus?)

It had not been recognized about here before. Is it too much, Sir, to ask, when I am likely to know the result of the thesis? With respect to some of the Utica trilobite Prof

Baily of geol. Surv. of Ireland through Mr. S. H. Birchall of the same Survey, tells me he has found the Martinezia spinosa Billings in the "Cambro-Silurian of Ireland".

Much work remains to be done yet & our hope to be able to go on.

With best wishes to Lady & Mrs Dawson believe me to be
Yours faithfully
Henry M. Sewi,
