Montreal.

Nov 11/83

My dear Sir,

On receipt
of yours of the 24th
ult, I looked over
the "chain of life"
and have made
some notes in
the direction of your
suggestions. I will
prepare a revised
preface and intro-
duce in this a few

Matter. My reason for
this is that a plant
referred to and figured
in page 93 Eopterus
of Saporta has been
found to be merely
a Mineral substance
and should be
left out while some
real plants worthy
of the name might take
its place. But if this
cannot be done I
can make the an-
notation as a note.

shall this amend not
but well in what
purposes to be a new
edition. I do not
know that there is
anything else requiring
change.

I shall attend
to the proof of the new
book so soon as it
arrives.
