

Dear Sir

I have completed and sent to Mr Boodle the manuscript of my article read before the Royal Society of Canada last Spring:

I have been delayed much beyond the time I had anticipated in getting it ready for the Press, but now that it is in Montreal you will be able to see what the species of our Formations are in detail. The Psychopodia and some minor groups I have yet to investigate, but

the work done may perhaps be  
of interest to you

Hoping that Lady Dawson  
and other members of your family  
are well I remain

Yours very truly

H. T. Matthews
