

8 Battery Place

Rotheray Jan'y 21/86.

My Dear Sir,

Your letter of 1st inst^r has come to hand, I may state that my two books Climate and Life, and Climate and Cosmology contain almost every thing which I have written on the points to which you refer.

I would have sent

you a copy of the latter,
but I presume that you
have already ordered it:

The state of my health
has obliged me to abandon
physical studies in order
to be able to finish some
work in Philosophy which
has been laid aside for
many years.

Yours sincerely

James Croft

Sir John W. Dawson

Croll,

Jan/86
