

Apr 3 / 86

Dear Mr Lowell,

Your Refers of
Jan Jan & Feb 1886
Your kind syllabus
of lectures on Development
of Plants which I
shall be prepared to
deliver in Lang West
asky for however to
plan the lectures as near
to each other as possible
as it is difficult for me
to remain a long absence
from my duties here

The subject will be dealt
with in 6 lectures in
I at most

I need also the
press I have prepared
for lectures on my recent
~~lectures~~ work in Egypt and
I find what has not
been treated of or yet
in any popular way
that I wish that I
prefer the pure Plants
as well as I found
I find with me.

Very
yours
G. M.
