

April 14/86

My dear Mr William

I find on my return here your note of the 25th March - as far as I remember I think the practice of the Museum has been to send you individually such of our publications as would naturally be of interest to you. - According to the Faculty regulations we can only send our publications in exchange but I have considerable leeway and if you will mark on the enclosed list the things you would like to have I will see what I can do in return on hearing from you. I spent last winter on the Nile and was greatly ^{interested} in the geology of the Valley. I see on reading up back nos. of Nature that you have published some observations on the subject. I am just beginning to look up the subject.

Yours truly

A. Agassiz.
