London, W.

June 12 1886.

Dear Sir William,

The Committee of Section E (Geography) is most anxious to have a paper on the Canadian Dominion. It has been suggested that a paper dealing with the Rocky mountains would prove interesting, more especially if the results of recent surveys could be embodied in it. I venture to appeal to you to select a gentleman of capacity to prepare such a paper. Perhaps Mr. Dawson would be willing to do so.

A favourable reply to this our request would confer a great favour.

I remain, Dear Sir William,
very faithfully yours,

ER Ravenstein
Sec. Secretary Section E.

Sir William Dawson, M.A.
&c &c &c.
