My dear Sir William

Many thanks for the loan of Jameson's book. As the last statement from one of the founders of the Natural System in Mineralogy, bearing the same date as Breithaupt's first volume, it is peculiarly interesting to me. While its conciseness makes it in many respects a model for a text-book of the Science. I shall take great care of the little treasure which you have sent me. I am now busy order-making & next month hope to give myself to Mineralogy.

I am much obliged to you for sending yr MS for the N. S. P. We shall, I think, begin printing this week. I am awaiting only Carbmact's Paper to have the whole

of section 3. in hand.

Thank you for the fine collection
of Grises sent me last week. which
have continued blossoming up to this
time.

Very faithfully yours

J. Henry Wood

Sir. J. W. Dawson & &
