9 July 1886

Dear Sir John.

I delayed thanking you for the paper containing your communication on Spores, thinking that I would have been able to send you a proof copy of mine on the same subject. I find however that I will not have the proof for a short time & as I go from home tomorrow for a couple of weeks or so, am afraid I will be unable to have it posted to you, so that you might receive it before you leave for this country - I hope however to let you have a copy on your arrival in England & for this purpose will be pleased if you can

favours me with your <sup>in Britain</sup> address,  
as soon as you can -

I always keep "peppin' on"  
at my fossils but my time  
has been a good deal broken  
into lately by my going from  
home for various causes -

I hope you are quite well  
& that we will soon see  
you among us -

With kind regards  
Yours

W. H. Miller

R. Kidston
