Dear Mr William

I have been looking forward for some time to the pleasure of meeting you again, and renewing our old friendship & acquaintance. I was also desirous of getting your opinion on some specimens of a Raslin or inferiorial earth deposit which has recently been discovered in the bottom of two farm-sized lakes near Wentworth, Cumberland Co. Nova Scotia. I think it is in the first or second edition of your Acadia Geology you mention that there is such a deposit at Wentworth, - but in the third edition it is not referred to, - I do not know why. I thought it would interest you to know that there probably is such a deposit at Wentworth,

and that the information contained
in your first edition of A. G. on this point
is abundantly confirmed by recent
discoveries.

Would you kindly send me
a Postal Card by return mail to
say whether I shall probably find
you at Montreal on Monday, the
26th Inst, when I hope to be there?

I enclose a small specimen of this
Resin from Westworth - sufficient
I presume for microscopical examination.

Thank the pleasure of meeting
me & your son some time ago at
St. J. We worked together in the
works for some time, & our intercourse
was I trust mutually pleasant
& profitable.

With kind regards to
Lady Oman & the rest of your family
as ever
Yrs very truly
J. Aldrich
