Lille, le 20^r Dec. 31 1886

Dear Professor Dawson

I have been very glad to receive news from you, though a little troubled by your observation on Lozong.

Had I written myself on Lozong, as I hope to do a day or another, my pleasure and my duty would have been to recall at first your kindness for me, and the help you gave me in directing me to the right place. I brought back from Canada a whole box of Lozong,

but had unfortunately no time yet
to prepare them.

The opinion given in Zittel's
Paleontologie, are Zittels and not mine,
and therefore I am not responsible
for them. If you like I will transmit
your letter to Zittel. At ~~all~~ events
I will be glad to receive from you
any Photograph giving accurately the
canal system; I would make of it
the best use I could.

Believe me to remain a great
admirer of your persevering and very
suggestive labours, and to be with
much respect
Yours very truly

Ch. Barrois

Liv. J. W. Lawson, T. R. S. etc.
