Montreal.

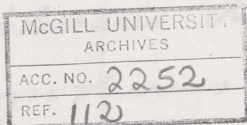

Apr 4, 1887

It is about Carpenter
about the Chertons
but fear I have
little chance of finding
an editor or publisher.
I think the Smithsonian
should undertake
it.

Truf yours,
G. M. Dawson

Dear Mr. Dall,

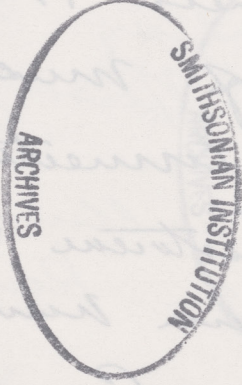

I have just
received your paper on
Turner's shells which
is of much interest
in connection with
Pleistocene species which
I am now looking over.
Could we not
have for our Peter
Redpath museum

Answer
April 18 1877

Smithsonian Institution

Dear Sir,
I have just
received your paper in
which you state that
the Smithsonian Institution
is in possession of the
original of the
manuscript of the
"Pencil in the
Hand" and that
you are for the
purpose of presenting

I should understand
that the Smithsonian
has either a published
copy or a copy of the
manuscript of the
"Pencil in the Hand"
and that you are for
the purpose of presenting
it to the Smithsonian
Institution.

MCILL UNIVERSITY ARCHIVES

duplicates of these
species. Baird reminds
me as much when
Linnel went up,
for some help which
I gave him on his
way.

Linnel especially
like to see —

Lot. foveolatus
Agilivania Linnelii
Chrysochromis Spitzbergen
Margarita umbonata
Modiolaria leigata
Crenella Jaba

I showed also the
to see *Macoma tenera*,
We have been in the
habit of calling a
shell very different
from *foveolatus* &
Bulthuis — *Tellina*
tenera, — as you know,

I fear some of
the things I ask are
very rare, but you
may have duplicates
from the collections,
I have written to
