TELEGRAPHIC ADDRESS.

27, Paternoster Row,

EXPOSITOR LONDON.

London, 26 April 1888

Dear Sir William Dawson,  
B.C.

The Appendix & Index have duly arrived. It is very unfortunate that the book has grown to its present dimensions, as we must make it  $\frac{9}{16}$  instead of  $\frac{7}{16}$ , and the size of the paper is small for the thickness of the volume, but this had to be made when the book was put in hand, & the earlier sheets were worked off to liberate type, so there is no help for it, and we will make the best of it.

We will attend to your wishes as to printing you 50 appendix with map, & returning Electros. Twelve Copies shall be sent to you & charged. The 12 gratis ones shall be used in sending to your order (various persons on this side).

I am very anxious to get the volume out at once, or it will be too late for the season, but you shall have an early copy by mail, & should there be any very important errata, you will please

Send us the same, it shall accompany  
the volumes not sent out. Unless there  
should be any errors of a misleading  
character we find as a rule it is better  
not to print errata, as attention is  
called to what otherwise might have  
been put down to a printer's blunder.

The printer has sent us a query as  
on page 427 enclosed, & we have given  
instructions to leave out the line giving  
Total:

Believe me

Yours very truly

M. H. Hodder

Sir William Dawson P.R.S. &c

And as the frame, the ball remaining  
the volume, not sent out. When there  
should be any cross of a handwriting  
character we find as a rule this letter  
not to print create as attention is  
called to what otherwise might have  
been put down to a printer's blunder.  
The printer has printed a query as  
on page 27, and about here have given  
an explanation to look out the line fairly

Notes.

Bellevue

Yours very truly

W. H. Woodcock

Wm. William Gordon G. D. D.

TELEGRAPHIC ADDRESS.

EXPOSITOR LONDON.

London, 26 April 1888

F. V.  
Dear Mr. William Denton,

The specimen tubes have duly arrived. It is very unfortunate that the book has grown too heavy in dimensions as we must make it of material of 1/2 and the size of the paper is small for the thickness of the volume but this has to be made when the book was put in hand, otherwise sheets were worked off to liberate the matter is no help for it, and we will make the best of it.

We will attend to your order as to printing for 50 specimens with maps & returning 3 copies. Charles Green's has been sent to you to change. The 12 parts we shall be used in sending to your order (various persons in this job). Our very anxious to get the volume out at once, or at least later into the printer, but you shall have an early copy of course, to enable them to any very important but I am sure you will please
