

COLUMBIA, MISSOURI.

May 4 - 1888

Prof Dawson }  
Dr Jn }  
}

I send by mail to  
you address a small box with  
coal & split wood from Lower  
Coal measure Sandstone

Warrensburg Johnson Co Missouri  
The fragment is part of a trunk which  
was met with in the Sandstone

quarry extending across horizontally  
I think for 60 feet, but not having  
seen the entire log I cannot certainly  
say. But I saw several sections  
of one to 2 feet long & a foot in  
diameter generally of a somewhat  
elliptic cross section, probably slightly  
preper - The outer portion or bark  
of  $\frac{1}{2}$  an inch <sup>thick</sup> entirely surrounding the  
trunk - I thought it would interest

Providence  
June 21st

you have heard it  
from my  
very respectful  
Ch. W. Brewster  
P.S. I must add that I  
have been very much interested  
in your Lake Park on  
"The Atlantic"  
of the Atlantic
