DE LILLE
rue des Fleurs, 1

LABORATOIRE
DE GÉOLOGIE

Lille, le May 18th 1885

Dear Sir

I take the liberty of
introducing to you one of my
friends, M. Lacroix, of Paris, who
intends to visit Canada this
summer.

M. Lacroix, though a young man,
is already one of our best authorities
in Lithology and mineralogical geology.
He wants to get acquainted with
American ideas and rocks, during
his scientific tour in America. I

would be much obliged to you
if you let me know at what
time M. Lacroix can meet you in
Montreal (August - January). Any assistance
given to my friend Lacroix will
be for me a personal favor.

I suppose you intend to come
in Europe this year, on the paper
of the geological congress in London? I
will be very happy to see you then,
and see you teaching as well of
your new theories.

Believe me to remain Dear Sir
yours very respectfully

Ch. Barrois
