

Eastwood & Mousecroft, Fire Bricks & Marl Works,

TELEPHONE N<sup>o</sup> 15.

HANLEY,

May 25 1888

Sir W Dawson

Sir

I am particularly interested in "Petrology" and mount many rock sections, and I am anxious to obtain a specimen of *Eozoon Canadense*, (from an authentic source) for microscopical work. Prof. Harvill Lewis of Philadelphia, gave me your name, and said that if I applied to you, you would no doubt favour me with a specimen - Would you kindly do so? - Should you require them, I should be only too pleased to send you a few sections of the same, in return for your kindness.

Yours respectfully

W. Hampton. F. C. S.

Kindly accept my apologies for troubling you.

W.H.
