Beverly -  
June 20<sup>th</sup> 1888

Dear Sir, William,

By the last mail  
I received "with the compli-  
ments of the author" your  
beautiful volume of  
"Modern Science in  
Bible Lands". Please ac-  
cept many thanks. Many  
of our "Stoff" Lane had  
a look into it, & a Prof  
West has ordered one  
for himself - The book  
must do good - I have

only and a few chapters  
& looked at different  
points - here & there - I  
contrasted much floor  
is going through the  
whole thoroughly -

I notice one or two

(1) Slip - Page 92 - line  
13 from top omit "late"  
Prof West is still with  
us -

(2) Page 97 - line 4 from top  
read Maxwell instead  
of Messhall

(3) Page 97 - line 7 omit  
"liver" - You & fluid should  
keep on page 95 - line 5

from Bottoms - Notes of Kelp  
ever is tautological -

Dr. Post has been in  
America for the last year -  
He has just arrived  
in London on his way  
back - I am sorry  
he did not have  
time to visit us -

but he was very busy  
in securing means  
to add to our Library -

We are all well  
and our work is  
prosperous -

Please re-

member in the Lady  
Dowson and your  
dear daughter. May  
we not hope to see you  
all in Syria again.

Yours truly  
with great respect  
Daniel Bliss
