Bristol - Hill

June 21<sup>st</sup> 1888  
LONDON  
England

My dear Sir William

I received last  
month one of your  
"works" "The Chain of  
Life in "Geological Time"  
through your Publisher  
in London, which of  
course led me to

Suppose it was sent  
by your request,  
very very many  
thanks for your  
great kindness, to  
so kindly thinking  
of me, I shall

at take great-pleasure  
in reading it - it  
must be so exceedingly  
interesting to write on  
such wonderful subjects,  
We have quite a  
small library of  
your writings, through  
your goodness in

cluding them from  
time to time -

I hope you & Lady Dawson  
are very well, we  
heartily think of you  
through William &  
Florence -

We are all well,

With kindest regards  
in which Mother unites

I remain

Yours affectionately

Mary Elliott
