Sir Wm Dawson - L.D.D. K.C.M.G. &c.

My dear Sir William -

I write a few lines partly for the purpose of making further enquiries regarding the results of your unfortunate fall at Metes, and partly to enclose some notes on the Geology of Northern N. B. and Maine, in fulfilment of my promise.

I refrained from writing to you soon after the accident as I did not wish to put you to unnecessary trouble, and saw by the papers that you were doing well. I trust that all effects of the blow have long since passed away, and that you have since been able to hammer out many more

curious things from those strange old  
rocks.

The notes which I send are brief;  
but will convey to you, I trust, a  
fair notion of what has been done and  
what results have been obtained in the  
region to which they refer. As therein  
stated I trust to be able to discuss  
the whole subject at length in a  
paper for the Society next year.

If there is anything more than I  
can do for you, please let me know.  
And with kind remembrances and  
good wishes to yourself and Lady Dawson,  
I remain

Yours very truly

L. W. Bailey

P.S. By the way, can you give me any in-  
formation as to the probable time and  
place of meeting of the Society next year?
