SHEFFIELD SCIENTIFIC SCHOOL OF YALE COLLEGE,

New Haven, Connecticut, Nov. 3 /88

Sir J. William Dawson

Dear Sir—

I have on hand a course of lectures which having answered their immediate purpose I would like to present to a larger audience through some one of our popular periodicals, such as the Century. The editor is in doubt however as to their scientific soundness. The lectures are entitled Science & Faith, Science & the Supernatural, Science & the Spiritual, Science & Miracles, My method and argument is so far as I know fresh and sound. However an endorsement as to the latter point from authoritative source seems necessary.

Would you be willing to examine and give your opinion as to the scientific validity of the argument? If so I can forward printed copies of all but the last which is still in MS. I dislike to presume so much but trust to your kindness and

known interest in such matters. It would
not however take long to decide from the
printed copies and possibly you might be
interested in the proposal.

The record has been reprinted in
England, now through several editions and
most favorably reviewed. I can easily obtain
access to religious or semi-religious
periodicals but they do not reach the
audience I wish.

Hoping you will pardon the liberty
I take I remain

Very respectfully yours

A. J. Alex. Bois -
