St John N.D. ^{reprints}
5. Feb. '89

Dear Sir

I see that my paper in the Record is out
But I have not rec^d. any
separates. I ordered 50 including
the number usually sent to an
author, and would like to
get them ^{for distribution}. Perhaps I should
have sent to Prof Mills about it
but I wanted to advise you
about an error in the last
tabulated statement of equivalency
where the Dikellocephalus-Cteno-
pyge Fauna is spoken of: it
should be Ceratopyge in place
of Ctenopyge. Ctenopyge and
Peltura belong to the same
Fauna viz: that of the Upper
Lingula Stage. The bracketing
is not altogether correct in
this table. Yours truly
G. F. M.

returned with the wood cut
I have the wood cut
kindly
Would you

Matthew
Esq 189
