

SECRETARY OF  
THE AMERICAN GEOLOGICAL SOCIETY,  
UNIVERSITY OF CITY OF NEW YORK.

NEW YORK, April 23 1889 188

Sir J. William Dawson,

My dear sir,

At Washington I had y ur nomi-  
nation signed by a peculiar combination of good fellows, Hyatt,  
Powell and Newberry. I thought that was a good group and stopped  
with them. The same signatures are appended to your son's name.  
We shall be in good shape by the Toronto meeting with not far from  
180 men on the roll. There remain not more than 20 geologists to  
be brought in and I expect them to materialize before the December  
meeting. After that we shall do little growing and will do well  
if we hold our own, for a few years. But 2000 dollars a year should  
enable us to issue a very creditable publication indeed.

When the ballot has been printed I'll send you a copy, that  
you may see how far we have gone.

I am

Sincerely yours,

*J. J. Stevenson*

SECRETARY OF  
THE AMERICAN GEOLOGICAL SOCIETY,  
UNIVERSITY OF CITY OF NEW YORK.

NEW YORK, April 23 1889 188

Sir J. William Dawson,

My dear sir,

At Washington I had your nomi-

nation signed by a peculiar combination of good fellows, Hatt, Towler and Newberry. I thought that was a good group and stopped with them. The same signatures are appended to your son's name. It will be in good shape by the Toronto meeting with not far from 100 names on the roll. There remain not more than 20 geologists to be brought in and I expect them to materialize before the December meeting. After that we shall do little growing and will do well if we hold our own for a few years. But 2000 dollars a year should enable us to issue a very creditable publication indeed. When the ballot has been printed I'll send you a copy, that

you may see how far we have gone.

I am

Sincerely yours,

*J. F. Johnson*
