

141 N. 44th St. New York City

June 8th. 1889

Dr J. W. Dawson, Esq. Chgo. N.S. etc.

McSill University,
Montreal.

Dear Sir William,

That is I have been asked to abet a
Scheme for the provision of a circulating
library for the benefit of young and
secularly paid country clergymen of all
protestant denominations by furnishing
those who are setting the project on foot
with a short yet select list of the
most approved as well as instructive
works on Natural Science Subject.

Feeling my incapacity, through inexperience
and the lack, perhaps, of good judgment,
and recognizing the deep importance
of making a proper selection in such
a case, I have assumed the liberty

of asking your aid in the matter, I spoke
 of my intention of consulting you to
 the projectors of this special and
 deserving philanthropy, and I am
 assured that they will consider your
 assistance as an inestimable favor.

What is desired at present is a
 short list of not more than from 20
 to 25 works on Science, — Geology, Anthropology,
 Ethnology & kindred subjects — such as
 may ~~be~~ ^{fall} on these subjects in a way
 most appreciable to those who will
 be the objects of the benefit. With these
 a nucleus will be made from which
 the department will grow.

If your most valuable leisure
 may not thereby be too greatly infringed
 upon, your contribution of this short
 list perhaps quite inestimably important
 Catalogues will confer upon many

yet most especially upon your late
penal a lasting favor.

While I expect being much the
worth of your hand yet I am pleased
to think that through this suggestion
so many may reap the benefit of
your most excellent judgment.

I was very much gratified at
the happy disposition of the Eastern
Prize and I hope that in the future
it may continue to fall into deserving
hands. With expressions of the
highest esteem I am very

Sincerely yours
Chas. H. Stone
