

June 13/89

Dear Mr. Longstone

Such a selection of books as you desire is our
joy to make. Keeping
in view however the ^{cliff} position
of the benefactor and the
probability that books of
moderate size & cost would
be most suitable. I may
name the following:

Lyell's Structure Manual of Geology
Dana's Geological History of the United States

Dana on
Coral &
Coral Reefs

Whechell's Sparks from a
Geologist's Hammer

Whechell's Life History of the Sea
Brinton's Bible & Science (Ch. Muller)

Guyot's Earth and Man

Huxley's Nat. History of the Rocks
Rawlins's Origin of Nations

Darwin's Chain of Life in (see
Geological work) (see
had
see)

Milner's Prehistoric Man (Ch. Muller)

The following from the
International Scientific Series
Putnam's (over)

Judd on Volcanoes
Leakey on Human Species
Pottier on animal motion
Fyrdall on Forms of Water
Journ Geolical Hist of Plants
Sturke on the Brunian fauna
Le Ninant Beginnings of Hist
Well, Paleontol replaced (Robert Darwin)
Parker Unfinished Worlds (Hodder & St)
Jensen The eyes before us
McDonald Creation of the Fall (constable
Boze = paths of Bible Knowledge ^{Bellevue}
about 10 small vols (Bel Had Soc)

I may add my own
Story of the Earth & Man
Origin of the World
Modern Science in
Bible Lands, all
of them pubd in U.S.,
by Harper N.Y.

We are much indebted
to you for the fact that we
received your kind letter
of reply. It will have good effect
as an educational stimulus to
the numerous students
This may
