

L. E. Moore
Greene

I find the Boston this time
interesting in our paper, the Boston
to get the work done, but not
of our young people, who have

interested in
I have a few bits of special
specimens of the tree in
little more to report.

I am, your faithful
L. E. Moore

27. Mrs. W. B. ...
...
Jan. XXVII. 1879

My dear Sir:

May I introduce
myself as one who brought
you a rare Jossé from Dr.
(Now-Sir ~~Walter~~ James) front of
Ottawa?

You sent me a few kind words
on the occasion - which I remember.

Can you tell me of any Book
or Journal - a Canadian Infusoria
or Water animalcules? I find
different kinds ^{here} - to those I used to
debilitate

delight to watch with my children, as
a Boy, in Q. A.

I find the Passion still strong
within me: and hope, this Vacation,
to go into the work again, with some
of our young people, whom I have
interested in it.

I have a plate full of excellent
specimens of Hydra Viridis.

With much respect,

I am, yours faithfully

Edmund Wood.
