CHEMIST.

LITTLE ROCK, ARK., 30 July 1889.

Dear Sir:-

In prosecuting fieldwork on this
morning during the past summer op-
portunity was afforded to visit a locality
in the north eastern part of this State
- near Gainesville, Greene County,
where are rocks, supposed by Orin to be
Potodan sandstones. They contain an
interesting fossil(?) supposed to be a
marine plant. There is no doubt but
that the sandstones are tertiary in
age, but the nature of this supposed
fossil is still problematical. Would
it be too much trouble for you to
examine a specimen if sent you?
We are exceedingly anxious to have

your opinion upon it, whether it is
to be regarded, properly, as a furcoid.

I am, sir,

Yours sincerely

R. Allsopp

Assistant Geologist

Sir William Dawson
