Sir J. W. Dawson

Dear Sir

I thank you heartily for duplicate
separata of your Dietyocordites, which is a
most interesting thing, and very important. I
have had a beautiful electrotype made of it
for the Fon. Dict. but I shall have time to
get your discussion of it at Toronto. Yesterday I
finished the last pages of copy for compositors
of the Second Volume, and expect them to be in
type setting this month. The last two §§ of
Vol. 1. are not yet struck off, nor the 16 pp. of
Errata. I have many cuts yet to make for
the Appendix Vol III, the text of which is nearly
ready for composition. Mr. Benedict, Principal
of High School, Port Henry, N. Y. writes me that he
has found extensive Potsdam Crustacean tracts.
Wolcott has visited them. Yours truly J. P. Lesley.
