Kansas City, Missouri.

Prin. J. W. Dawson:

Dear Brother: -

I have recently read your work on "Science as it relates to the lands of the Bible", with very great pleasure and profit. Is there any copy of the Egyptian Exploration Survey of the East side of the Red Sea that is accessible in this country? Where can copies thereof be obtained in England?

I would also like very much to get hold of the arguments of the Duke of Argyle and others, identifying the Deluge with the submergence of Europe at the close of Lyell's Second Continental Epoch. Can you give me the address either in this country or in England from which I can procure these things? I would also like to get hold of Hamilton's argument for the recent existence of the *Solar system* ~~earth~~, which he gives as twenty millions of years, according to your quotation. I have his earlier writings upon the age of the solar system, but I judge from your allusions that this is some more recent statement of the same. Where are they attainable? On page 500 of the book "Modern Science in Bible Lands", (and the same cut is given in "Egypt and Syria"), it looks as if your picture of the dome of the rock showed the dip of the rock to be from east to west, while on page 492 it looks as if the dip was from west to east, as is also indicated on page 438. I take it this is simply an inaccuracy of the engraver. If it is not asking too much of you, I shall be greatly obliged if you will do me the favor of a reply.

Yours Most Truly,

Geo P Hays
