Sir Wm Dawson  
McGill College

Dear Sir many thanks for your  
kindness in giving me the  
certificate for which I asked.

I purpose reading a paper  
on some interesting points that  
have come before me whether  
examining asbestos deposits,  
before the N. H. Society, if the  
Society is willing. Or more

than one occasion I have had  
interesting facts in mineralogy  
and geology brought to my  
notice. These I have wished  
to publish or lay before the  
other society but my clerical  
have objected. The same  
applies to my Chemical  
work. I hope however  
to have more freedom in  
this respect in the near  
future.

Again thanking you

Yours faithfully  
J. J. Dmald
